## EDUCATION

### Full-stack Web Development BCA (Be coder academy)

01/2024 - 08/2024

Seoul, South Korea

#### Courses

- Front-End Skills
- Database Knowledge
- Hands-On Projects
- Back-End Skills
- DevOps Exposure

### Bachelor's degree Joongbu University

09/2022 - Present

Seoul, South Korea

#### Courses

- **Core Courses** : Focused on international trade dynamics, trade policy analysis, global market strategies, and economic diplomacy.
- **Korean Language** : Completed basic Korean language coursework.

## WORK EXPERIENCE

### Freelance Be Coder

05/2024 - Present

Seoul (Remote)

Developed and deployed web applications across front-end and back-end using modern tools and frameworks, delivering high-quality, integrated solutions

#### Achievements/Tasks

- **Front-End**: Created responsive UIs using JavaScript, ReactJS, Hooks, styled-components, and integrated over 10 open-source libraries.
- **Back-End**: Utilized Node.js, Express.js, Mongoose for MongoDB, bcrypt for password hashing, and JSON Web Tokens for authentication.
- **Cloud**: Deployed and managed applications using TimeWeb S3 cloud services.
- **DevOps**: Managed domains with Ahost.uz, configured SSH for secure access, utilized Nginx for web server management, and used PM2 for process management and application monitoring.

React JS Node JS Express JS Hooks  
GitHub Netlify Figma DataBases  
MongoDB MongoDB Atlas Postman  
Algorithms API Tokens

## PERSONAL PROJECTS

### Camper (04/2024 - 08/2024)

- Built a real-world marketplace web application for discovering and browsing camping cars using the MERN stack. This project includes a powerful admin dashboard, a robust backend with MongoDB, Express, and Node.js, and an engaging front-end with React. It provides users with a seamless experience to search, view, and connect with sellers effectively.
- **Backend**: Developed with Node.js, Express, and MongoDB. Utilized RESTful APIs and secure authentication for efficient data handling.
- **Frontend**: Created with JavaScript, TypeScript and React , featuring responsive design and interactive UI components for a seamless user experience.

<https://www.admin.rakhmatulloh.uz>.

### EduManSim (07/2024 - 09/2020)

- Developed a **CRM for Education Management** , a web application designed to streamline student and course administration. The system offers features for managing student records, tracking progress, and facilitating communication between educators and students.
- link: <https://crm-education.netlify.app>.

### To-Do List

- To-Do List is a CRUD web app for managing tasks.
- link: <https://todo-apps-2024.netlify.app>.

### More than 10 Landing Pages

- Developed various single-page applications, including a kitchen management system, e-commerce bookstore, educational platform, job portal, and travel agency booking system. Used JavaScript, ReactJS, and open-source libraries for dynamic, responsive designs and user-friendly interfaces.
